# PiiGAB P1 Converter

Convert your smart utility meters data to M-Bus.

Smart utility meters sends consumption data instantly from the gas, water and electricity meters i the buildings. With the PiiGAB P1 Converter you can easily convert this data to control and optimize your property when data converted to M-Bus. Connect the PiiGAB P1 Converter to the P1 port and you are ready to go.

FOLLOWS PROTOCOL STANDARD

PiiGAB P1 Converter converts P1 Companion Standard, Dutch Smart Meter Requirements to M-Bus (EN-13757-2, 3). Gas, water and electricity meter data becomes available as M-Bus.

WHAT DATA CAN I READ OUT?

PiiGAB HAN-P1 Converter reads and converts messages depending on which sub-meters are connected, you can read out data from energy types such as electricity (consumed and produced as well as gas and water.

ACCESSORIES

The cable that connects between the utility meter and the PiiGAB P1 Converter is available from us as an accessory, 1m, 3m and 5m.

Utility meters without power supply via the P1 port can be supplemented with our power supply kit.

If several P1 units are to be connected to the same utility meter, supplement with a P1 splitter when placing your order. See accessories document or PiiGAB.com
